

Report: Survey and Plat of County Road from Irelands Crossing on W. H. river

Rd #15

Snyder & Reeds Saw mill

State of Oregon County of Wm. W. June 19 1871

The the Reviewers appointed by your honorable body to review a County Road from Irelands crossing on the W. H. river to Snyder and Reeds mill beg leave to submit the following report that we proceeded according to notice on the 2^d Monday in June to review and locate said road according to the application and our instructions to wit commenced at Irelands crossing and found a good practical way for road to George Sargents on Dry creek locating the same on and along the road as it now runs and from George Sargents to Henry Boyces found a good route for road there being but little work to do to make a good wagon road from thence to the North East corner of Daytons Greens land claim thence South along said line to Weston thence South to the center of Neffs land claim thence due East to a point intersecting the old road running from Weston to Snyder and Reeds mill thence along said road as it now runs to Snyder & Reeds mill and would represent that we found a splendid way or route the entire distance of said road and that it shortens the distance from Irelands to Weston some two miles and on better ground for a road. But we were very much disappointed by the County Surveyors not meeting us we therefore cannot give the distance on this route nor could we mark it with any accuracy we therefore recommend that this road be reestablished and surveyed.

all of which we most respectfully submit
