to sec. corner.

From the $\frac{1}{4}$ sec. corner on the south of sec. 3 I ran
east on random line

I then set the S. E. corner of sec. 3 by proportional
measurements from the lines run east and west, and north and
south.

I then set a stone in the center of sec. 3 by means
of lines running both east and west and north and south
from the $\frac{1}{4}$ sec. corner to $\frac{1}{4}$ sec. corner.
